

How To Put A Site Waste Management Plan In Place & Why You Need To Do It NOW!

Site Waste Management Plans (SWMPs), currently still voluntary, are set to become a legal requirement as of April 2008. As it stands, all construction and refurbishment projects over £250,000 will be required to produce a SWMP.

As a sector, we have a major part to play in ensuring contracted companies adhere to SWMP production in an effort to decrease waste production, divert waste from landfill and reduce fly-tipping.

This is an interactive seminar with workshops providing practical advice and examples on what a SWMP plan actually is and how to go about implementation with good and best practice. You will realise the benefits including significant cost savings of such plans and develop skills which will enable a successful SWMP plan to be undertaken back in the workplace.

This workshop will be of particular benefit to Estates Project Managers, design teams and contractors regularly used by your institution and Environment or Sustainability Managers and Coordinators.

The day uses WRAP (Waste & Resources Action Programme) training materials with sector case studies from Southampton University and Queen's University Belfast, whom will provide guidance on their experience with SWMP within their institutions.

This workshop will:

- Highlight the benefits of SWMPs including cost savings
- Share best practice with sector case studies
- Provide practical advice on how to embed SWMPs
- Give example SWMPs

**Material change for
a better environment**

Who Should Attend:

- Estates Managers
- Project Managers
- Design Teams
- Contractors
- Waste Managers
- Organisations working with the sector

Programme

- 09:45 Registration
- 10:00 Welcome
Fiona Goodwin, EAUC
- 10:10 Introduction to SWMP & standard, good & best practice
Estelle Herszenhorn, Construction Project Manager - Waste Management, WRAP (Waste & Resources Action Programme)
- 10:35 **Workshop:** Standard, good & best practice
Facilitated by Sarah Boulger, Newcastle University
- 11:05 Coffee
- 11:20 On-site operations
TBC, WRAP (Waste & Resources Action Programme)
- 11:50 **Workshop:** On-site operations
Facilitated by Sarah Boulger, Newcastle University
- 12:25 Lunch
- 13:15 Embedding SWMPs, including design
TBC, WRAP (Waste & Resources Action Programme)
- 13:45 **Workshop:** Embedding SWMPs
Facilitated by Sarah Boulger, Newcastle University
- 14:10 Coffee
- 14:20 **Case Study:** Queen's University Belfast
Adrian Davis, Environmental Manager
- 14:45 **Case Study:** Southampton University
Dr Neil Smith, Environmental Manager
- 15:10 Questions & Answers
Facilitated by Sarah Boulger, Newcastle University
- 15:30 Close
