

Waste Essentials

Waste Management Legislation & How to Change Behaviour

If ever there was a course you needed to go on it is this one! If you have a responsibility for how your college or university handles or disposes of its waste, this is a 'must attend' for you.

'Waste Essentials' is a one day course, targeted specifically at the education sector. It will guide you through the basics of all essential waste legislation, including actions you need to take to comply. If you are new to the job, or the HFE sector, or are confused by the volume and complexity of waste legislation, this event is for you.

As well as an up to date and comprehensive guide to waste legislation, this course will pin point resources and guidance to help you manage your waste more effectively. One session will also be dedicated to changing behaviour and motivating colleagues and students to reduce waste and recycle more. There will also be many opportunities to ask questions, however simple they may seem, and share experiences with colleagues in other organisations.

All of this will ensure you return to your organisation equipped with the essentials for better waste management.

Legislation covered will include:

- The Duty of Care
- Hazardous Waste Regulations
- Waste Electrical and Electronic Equipment Regulations
- Landfill regulations
- Environmental and Waste Management Permitting

This workshop will:

- Highlight the essentials of current waste legislation
- Share best practice with sector case studies
- Provide practical advice on how to get people on board
- Practical elements of waste management

Who Should Attend:

- Estates Managers
- Project Managers
- Waste Managers
- Organisations working with the sector

26 November 2008
University of Leeds

£150 EAUC Members
£250 Non-Members
